VOL. XXV, NO. 26.

THE BLAIRMORE ENTERPRISE, THURSDAY, JUNE 28, 1934.

\$2.00 PER ANNUM

COLE'S —THE MODERN THEATRE— BELLEVUE

FRIDAY and SATURDAY, June 29th - 30th
The Screen's New Star
ANNA STEIN in **"NANA"**
The tragic daughter of Voluptuousness of Zola's Immortal Classic
Also
Comedy "MIXED NUTS"
News REEL
Silly Symphony in Color "Funny Little Bunnies"

MONDAY and TUESDAY, July 2nd - 3rd
The 4 Marx Brothers
THE SCREEN'S CRAZIEST CLOWNS
IN
"DUCK SOUP"

COMEDY — Admission 25c and 10c — SERIAL

WEDNESDAY and THURSDAY, July 4th - 5th
Sylvia SYDNEY and Fredric MARCH
IN
"Good Dame"

Comedy "THE NEW DEALERS" — Novelty "WATERLORE"
Admission 30c and 10c

FRIDAY and SATURDAY, July 6th and 7th
'Eskimo'
A Mighty Drama of the Frozen North

Three young gaffers from the Castle River district were in town on Friday last, in the persons of Jim Miller, Wall Eddy and Jack Giola. They were here to arrange with The Enterprise for printing for the big sports to be held at the Castle River Athletic Park on Wednesday, July 18th. A banner programme of events is being arranged and an attendance of at least five thousand is expected. Just mark July 18th on your calendar and plan your outing for the stampede, near the South Fork bridge, about three miles south of Burnis.

It costs just as much to buy an apple in London or in the Soudan desert as it does in some parts of British Columbia. This is another of those "Believe it or not" statements, but it may be believed because it is absolute truth. The method of remedying it does seem absurd, that while apples are grown by the millions in one section of this province, still so far as another section just a few hundred miles distant is concerned, these apples might as well be grown on the canal river face of Mars. Country Life in B.C.

BLAIRMORE PUBLIC LIBRARY

During the months of July and August the library will be open on Thursday nights only, each week. Hours 7 to 9 p.m.

INVESTIGATING BIRD DISEASES

Bird disease specialists of Alberta and the United States will join this summer in extensive plans to study and combat the mysterious disease which has killed thousands of ducks at Stobart Lake in southern Alberta. The provincial department of agriculture, with the co-operation of the University of Alberta, is planning to combat the disease this year. At the same time came a second announcement from Calgary that Dr. E. M. Kalmbach, bird disease specialist, of Denver, has been instructed by the biological survey branch of the United States federal government to visit Stobart Lake on July 1st.

The football draw will take place at the dance in the Columbus hall of Monday, July 2nd. All stubs are to be in by 6 p.m. on that day.

Bill Duncan was telling Romeo about a fish he almost caught at Castle River. "About the size of a whale, wasn't it?" asked Romeo, not. "I was battling with whales," answered Bill.

Lyman Johnson, of Coleman, is residing in the Canadian Bank of Commerce at Claresholm during the absence of Mr. Gaetz, who is visiting his parents at Red Deer. Claresholm Local Press.

It's really dangerous to be in the woods around Blairmore right now. Birds are particularly numerous, and one head of a thin woman actually carrying a man's hat off his head on Sunday last.

George was giving a talk at a mixed gathering at Hillcrest, when somebody hissed. A stunned silence followed, then George calmly said: "There are only three things that hiss—a goose, a snake and a fool. Come forth and be identified."

An automobile license number plate, lost from a Coleman car between Lethbridge and Coleman, was returned to its owner at Coleman but a few hours after The Enterprise, carrying an ad, appeared off the press. It was picked up near Macleod. The Enterprise covers the district thoroughly.

A party of about forty young and old people from west Blairmore held a picnic at Castle River on Sunday last. A night July time was reported. Since the picnic, evidence that something or other has affected the fish in that locality appears, for on Tuesday a finny creature was seen with his head above water, feebly muttering: "Ha'e one on me!"

Despite the fact that Blairmore has a public library, subject of course to a nominal membership fee, the local town council has voted the sum of twenty-five dollars towards a library suited to the Communist element. The public can read from this that the average public library in Canada does not contain what the foreign-born and un-naturalized citizen of these parts desires in the way of reading.

A local guy submits the following causes of unemployment for meditation: 1, withholding the franchise from women; 2, faulty laws relative to the standardization of stomachs; 3, want of training of girls for future duties; 4, the custom of free box-car riding; 5, high telegraph rates; 6, the use of tobacco; 7, the high tariff; 8, women wearing male attire, also fancy haircuts; 9, politicians changed into scientific dietaries; 10, the use of intoxicating liquors—too much foam, not enough beer; 11, not enough spots on the sun, but too many patches on pants; 12, going hungry in the midst of plenty.

LOCAL TEACHERS TO BE RE-ENGAGED

At a meeting of the Blairmore local of the Alberta Teachers' Alliance on Saturday last, in joint meeting with the school board, a resolution was passed to re-engage all teachers of the present staff. The daily press reports would cause one to believe they were forced to such action by the influence of the local union of the Mine Workers' Union of Canada. Same salaries as were in effect last year will be paid, together with increments due the teachers. Chairman Olson, at the meeting, pointed out that he wanted the Blairmore school to be the best in the Crow's Nest Pass, and while he thought that it was as good as the average, he was not satisfied. Nothing short of the best would suit him, and he thought there was room for improvement in attendance, proficiency and general discipline.

RAILROAD TRAIN SAFEST PLACE

In a recent "believe it or not" release by Ripley, it was brought out that next to a bed a railroad train is the safest place in the world, there being an average of one fatality for each 750,018,557 miles travelled. This spectacular record was not achieved overnight, but is the result of long experience in training men and improving equipment and appliances. Railway employees, state the Canadian National Railways, are one of the highest trained bodies of men in any industry, and these in charge of the operation of trains are compelled to undergo medical examination at stated periods, so as to insure their continued fitness for their duties.

It is proper to sell liquor in Government stores, it is proper to advertise it and we are prepared to advertise it when it becomes legal. We believe that the obsolete idea of local option districts should be abolished. Time and its changes, such as the motor car, make it imperative that the entire province should be open. Why sell in Grimsby, seven miles away on another highway, and not in Smithville?—Smithville Review

At a recent meeting of the town council, Fred Link was awarded the town-scavenging contract at a rate of around \$150 a month. We understand that this extra burden is to be worked out on a basis of around 25c a month for each household or 12 occupant. The system will be well received and no doubt ratepayers or citizens will be glad to have the amount added to their monthly water rate, thus doing their part toward making Blairmore one of the cleanest and best towns in Alberta.

Learning that he had won over \$4500 in a sweepstake, Walter Rogan, C.N.R. train conductor of Edmonton, cancelled his train and went to bed, with instructions that he be allowed uninterrupted sleep. Rogan, when news of his win came through, immediately notified his wife, and as soon as the courthouse opened, Mrs. Rogan filed an informer suit, claiming the amount won. Meanwhile, her husband, happy in the knowledge that he had protected himself against the fool Canadian law which gives sweepstake winnings to informers, was determined to sleep until 5 p.m. the following day at least.

Rev. Dr. Kelloway, of the Dominion United church, Ottawa, has accepted a call to succeed Rev. Dr. George A. Dickson as pastor of Knox United church, Calgary. Dr. Kelloway is thirty-eight years of age and a native of Newfoundland.

Pass Hotel Manager, as he sampled the new cook's first soup: "You say you served in France?"
Cook: "Yes, sir. Officer's cook for two years, and wounded twice."
Manager: "You're a lucky man. It's a wonder they didn't kill you."

MONDAY NEXT GALA DAY IN BLAIRMORE

Monday next promises to be one of the biggest sports days in the history of The Pass, and the big Blairmore stadium will be the drawing card. Elsewhere in this issue will be found the programme for the day, which is to be followed in the evening by a championship boxing programme and a dance in the Columbus hall, for which latter the Band Its orchestra has been engaged. If you have a Union Jack, fly it on Monday.

LEAVING THE CAMPS

We are told that the unemployed in relief camps are leaving the camps and hitting out on their own, and this is being pointed out to us as a sign of better times that have been around the corner for so long a time. But it may not be so good a sign as it appears on the surface, because there is the question whether the men are actually getting work or not. It is a sign of better times on the part of the men themselves in so far as they are tired of the camps and are taking a chance on something better turning up if they go after it. A great many of them are going on the roads. We know that the B.C.-Alberta road is alive with men going and coming. Some are on their way to Jasper, others are coming back from the mountains. We know they are not all "flush," because one roadhouse proprietor says he has as many as ten some days at his door begging. What applies to one roadhouse will apply to them all. It is shifting the burden from the government to the people who are already paying taxes for relief. We certainly admire the spirit of the men in making efforts at independence and some of them may make good in the mountains, but many of them are not equipped for mountain work.—Holden Herald.

BLAIRMORE UNITED CHURCH
Rev. Albert E. Larke, Minister

"Serve the Church that the Church May Serve You."

Services Sunday, July 1st, the minister in charge.

10 a.m.—JUNIOR SCHOOL.
11 a.m.—SENIOR SCHOOL.

WORLD HAPPENINGS BRIEFLY TOLD

Fifty additional constables have been engaged on the Northern Ireland border to cope with cattle smuggling from the Irish Free State.

The Prince of Wales has accepted the presidency of the English-Speaking Union of the British Empire, it was announced in London.

Twelve new warships are to be built for the Polish navy, it was reported at Warsaw. They will be four mine sweepers, two destroyers and six submarines.

What is probably the world's largest modern lathe has just been made at Sheffield for the English Steel Company to admit forgings up to 60 feet in length and 80 inches in diameter.

Once again, the fact that Britain has no intention of handing over Bermuda or any other territory in payment of the war debt to the United States was stated in parliament.

A court-martial found Augustine Waldemars, former premier of Lithuania, guilty of an attempt to overthrow the existing government, June 7. It condemned him to 12 years at hard labor.

Without fuss or ceremony, the bridge across the second narrows of Burrard Inlet, connecting Vancouver with the north shore, was re-opened for traffic after being closed nearly four years.

The birth rate in England and Wales was higher during the first four months of this year than in the same period last year, according to vital statistics made public recently. An increase of 906 births was recorded.

Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

Four Trips Each Year

Air Mail Service For Fond du Lac Post Office

Between 8,000 and 10,000 letters from air mail collectors were carried on the inaugural flight June 15 between Fort Chipewyan and the new post office being opened at Fond du Lac, at the eastern end of Lake Athabasca, according to postal officials at Edmonton.

Information from Ottawa shows that the Canadian Airways Ltd., which has the mail contract, will make four trips a year between the two offices.

Establish Farm Schools

Prince Of Wales Donates Sun For Child Emigration's Society Plan

The Prince of Wales has donated \$5,000 to the Child Emigration Society's scheme for establishment of farm schools in the Dominion for children from Great Britain, including a farm school in British Columbia.

With the support of the prince the society launched a campaign for \$500,000 to develop the scheme, which has proved very successful in Western Australia. Children remain at the farm schools five or six years.

It is estimated that 25,000,000 persons live in the 133,700 square miles of the Punjab region of India.

OGDEN'S - Cuts well that Smokes Well

Youngest On Bisle Team

Sergeant Don Breeton Is Member Of Winnipeg Rifles

Sgt. Don Breeton, lone representative of Manitoba on the Canadian Bisle team, is only 19 years of age and one of the youngest shots ever to win the honor of shooting for Canada against picked marksmen from South Africa, India, Ceylon, Australia and other parts of the empire. He is a member of the Winnipeg Rifles (Little Black Devils).

Sgt. Breeton began his rifle practice at the age of 12 under the tutelage of Lt-Instructor T. Rutherford, with the Winnipeg Cameron Highland cadets. In that year he won the cadet grand aggregate and has placed among Manitoba's outstanding riflemen in the Dominion shoot at Connaught ranges, Ottawa, four times since.

Only two others Westerners have been picked with Breeton for the squad of 18 sharpshooters to represent Canada. They are Lieut. S. Johnson, Wayne, Alta., and Sgt. K. Idolite, Calgary.

Winnipeg Newspaper Union

349

ACTIVE SPORTS AND SPECTATOR SPORTS FROCK

It has a cape that buttons "on". Plan your summer wardrobe now, while you have the choice of all the lovely cotton fabrics. They reign supreme this season.

A gay stripe in plique made the model for today's pattern. Note in the small view the cape you can button "on" for spectator sports or you can even wear it to town.

Other smart cottons are plaids or stripes in peasant weaves, shirtings, gingham, woven seersuckers (that need no ironing), eyellet batistes, etc. Linen, plain tub pastel silks, shirting silks, etc., are other nice mediums.

Style No. 349 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 2½ yards of 36-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

JULY 1

ABRAHAM AND THE DIVIDED KINGDOM

Golden Text: "Pride goeth before destruction, And a haughty spirit before a fall." Proverbs 16:18.

Lesson: 1 Kings 11:26-43:31.

Devotional Reading: Proverbs 1:20-26.

Explanations and Comments

Jeroboam's Rise To Power, 11:26-28. Jeroboam, a young man of the northern tribe of Ephraim, was among the subjects of Solomon, engaged in forced labor upon the adornment of Jerusalem, his capital. Solomon observed his efficiency and made him overseer of all the royal labor furnished by the house of Joseph—the tribes of Ephraim and Manasseh—the position which enabled Jeroboam to stir up his fellow laborers' jealousy of the Southern tribes and hatred of Solomon the oppressor.

Abijah's Symbolic Act And Its Meaning, 11:29-33. One day, as Jeroboam was leaving Jerusalem, intent on thinking, no doubt, of how he would "lift up his hand against the king" (see verses 26, and 37), the prophet Abijah met him. The latter had come from the sanctuary at Shiloh for this express purpose, to deliver Samuel's delivery of a similar message to Saul, 13:4-7. Abijah took hold of the new garment he was wearing and tore it into twelve pieces, ten of which he handed to Jeroboam, saying that the kingdom was to be taken away from King Solomon and Jeroboam should be ruler over ten of the tribes. It was quite customary to enforce important communications by symbolic acts. Compare 1 Kings 22:11; Isaiah 20; Jeremiah 10:1-12; Ezekiel 32; Zechariah 11:7-17.

The Condition To Be Fulfilled, 1 King 11:37-39. Abijah repeated to Jeroboam the promise that should be king over Israel. "The seed that on prepared soil, and Jeroboam's formed plans would be consolidated and fixed." The scene is like that in which the witches plotted to Macbeth his dignity. Slumbering ambitions stirred, and a half-inclined will is finally decided to this glimpse into the future.

There was, however, a condition to be fulfilled. He would have a "sure house," or long line of descendants upon the throne of Israel, provided he hearkened unto God's commands and kept them as David had done. The condition was not fulfilled, and his house came to an end in the second generation.

Newest In Air Transport

German Inventor Has Patent For Steam-Driven Plane

Another invention in connection with airplanes is being talked of in Europe. It is stated that this promises to be the most revolutionary development in air transport since the first aeroplane was built and is foreshadowed by a German inventor. He has just patented a steam-driven aeroplane which he claims will fly at 270 miles an hour for sixty hours or more non-stop.

This astonishing claim means that any ordinary aeroplane could attain Schneider trophy speeds; and that an airman could fly from Europe to the Far East or South Africa in three days without coming down for fuel. Crossing the Atlantic to North or South America would be a short and easy journey.

The inventor is named Huettner and he is managing engineer of the biggest power station in Berlin, a man whose reputation would not allow him to make wild claims. He is a steam turbine, and he goes on to state, he has succeeded in making it so light that it is no heavier in proportion to horsepower than the present petrol engine. Moreover, there is no risk of fire and explosion, which now costs so many airmen's lives—Brandon, Sun.

Is Really Resting

The woman who dances on spindly heeled shoes is really resting, the West Virginia Osteopathic Society was told. "When a woman puts on high-heeled slippers and goes to dance she is giving her feet a beneficial rest," said Dr. H. E. Cybours, of Columbus, O. "The change to high-heeled slippers changes the muscular pull of all the muscles and gives the feet a rest."

Little Journeys In Science

ANAESTHETICS (By Gordon H. Stet, M.A.)

Acclaimed as "God's greatest mercy brought by man to man," ether was first used in surgical operations nearly 88 years ago. The first demonstration took place in the Massachusetts General hospital at Boston on October 16, 1846, when William T. G. Morton, a young Boston dentist, demonstrated that this anaesthetic could be used successfully in the performing of operations. Although Dr. Morton is credited with giving the first demonstration of the use of this anaesthetic before a group of medical men, it is understood that a Dr. C. W. Long, of Jefferson, Georgia, had previously used it to some extent in his practice. Following Dr. Morton's demonstration, the use of ether was quickly adopted by medical men on this continent and abroad. This new development brought about a great revolution in surgery and did away with the gruesome scenes which had formerly been associated with operations during which the patient did not lose consciousness.

In 1844 Humphry Davy, the English scientist known throughout the world for his invention of the Davy Safety Lamp, used by miners, did some work with nitrous oxide, better known as laughing gas. This gas proved to be a satisfactory general anaesthetic and is widely used for this purpose. With the discovery of ether and laughing gas, scientists became interested in this new field and it was not long before chloroform was produced. Dr. James G. Simpson and Thomas Nunally being outstanding in this work.

Ethylene is another anaesthetic which was introduced in later years, and which was found to have many advantages for surgical work. Acetylene is also used as an anaesthetic, but is not as common as the others.

In addition to the value of anaesthetics in relieving suffering during operations, they have benefited humanity greatly by making it possible for scientists to study various diseases and to find cures for them. Animals, studied under the influences of anaesthetics have been the objects of many researches which have brought about great benefits to the race.

Recipes For This Week

(By Betty Barclay)

MINCE MEAT MOLASSES COOKIES

9 ounce package dry condensed mince meat

½ cup water

½ cup butter

½ cup brown sugar

1 egg

¾ cup molasses

3 cups flour

¼ teaspoon soda

½ teaspoon salt

¼ teaspoon ginger

Boil dry condensed mince meat and ½ cup of water for 3 minutes or until mixture is almost dry. Cream butter and sugar together. Add beaten egg and molasses. Mix and sift flour, soda, salt and ginger. Add dry ingredients to butter mixture gradually. Fold in cooled mince meat. Drop by spoonfuls on buttered cookie sheet and bake ten minutes, or until brown in a moderately hot oven (375 degrees F.). This recipe makes 4 dozen cookies.

SPRING SALAD

1 package lemon or lime-flavored gelatin

1 pint warm water

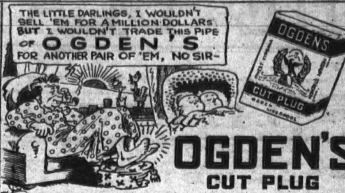

1 tablespoon vinegar

1 cup nut meats, chopped

2 cups cucumber, diced, salted and drained

1 cup celery, diced

Dissolve gelatin in warm water. Add Vinegar. Chill. When slightly thickened, add nuts and cucumber. Turn into mold. Chill until firm. Unmold on crisp lettuce. Serve with mayonnaise. Serves 8.

New Super-Cunarder

Surprising Details Of Vessel Now Being Built In Clydebank Shipyard

The enormous size of the funnels to be placed on the new super-Cunarder, now designated as the 534 in the Clydebank shipyard, Glasgow, may be visualized when compared with other various tubes and tunnels in operation in New York City. The giant liner's stacks will be in the neighborhood of 100 feet in circumference. The diameter will be approximately 30 feet. Thus it will be greater than any of the following: Holland Tube, 29 feet 6 inches; Pennsylvania R.R. Tubes, 23 feet; East River Tubes, 23 feet; New York Central Tunnel, 25 feet; Harlem River Tunnel, 15 feet 9 inches; 60th Street Tunnel, 18 feet.

The forward funnel will be more than 70 feet in height from the boat deck, the two other funnels decreasing in height. From the keel to the top of the funnels will be approximately 180 feet, equivalent in height to a building of 15 stories. The final design of the funnels, reached after many demonstrations in a specially constructed wind tunnel. More than 30 model funnels were tested.

A highly important job is taking place in the shipyard in connection with the fitting of the immense rudder. Constructed at Darlington, this rudder weighs nearly 140 tons and is by far the largest ever made. It is at present in the shipyard at Clydebank where expert workmen are engaged in assembling the various component parts. When this job is completed and tests carried out to ensure that every detail in the fitting is perfect, the rudder will be dismantled and transported in sections to the ship's berth where it will be re-assembled and fitted on to the ship.

Other tests which have been carried out include those to determine the design and form of the liner, in which over six hundred models were used and over four thousand experimental runs carried out in the experimental tank; the wind tunnel experiment, in which models of 30 funnels were used, to decide the design and shape of the great funnels and to make sure that the decks and ventilators of the ship will be kept clear of funnel gases and the experiment made to ascertain the exact position on the bows of the hawsepipes. For the latter purpose shipwrights erected the shipyard a wooden replica of the immense bow of Number 534 and with a model of the hawsepipes and another model of the anchor a series of tests were made, perfection in action being finally achieved.

In the area of cabin being constructed ashore for testing purposes, everything that goes into a stateroom of all three classes of accommodation will be given a critical try-out. The rooms will be exact replicas of similar rooms which it is intended to build into the ship.

The designers and furnishing experts will fit out the model rooms down to the last detail. Numerous designs in wall decorations, curtains, carpet and hangings will be tried out; furniture, beds, wardrobes, easy chairs, etc., will be installed until the designers are satisfied that the decorative and furnishing schemes provide the maximum of comfort and restfulness.

An important feature will be the demonstrations carried out in regard to the heating, lighting and ventilation of the rooms. Scores of these experiments will be made to make certain that the perfect ease and comfort of the passengers will be assured.

These model cabin experiments are another remarkable instance of the meticulous care and attention which is being paid to the construction of this great ship.

Journey To North

Fifty Students To Take 1,000 Mile Voyage Down Mackenzie River

Bayne Beachamp, Honolulu English professor, will lead a party of 11 "teen-aged white boys" from Punahoa school, Honolulu, and four American lads on a 1,000-mile voyage this summer down the Mackenzie river, through the northwest territories and into sub-Arctic Canada. In boats they will build themselves at Athabasca, Alaska.

Tentative plans call for an overland trip by automobile to Edmonton and thence to Athabasca, where they will construct boats for the trip down the Mackenzie to Alaska. After a summer of exploration and field study, they will travel by aeroplane over the Divide to Nome, Alaska, or Valdez Island.

Agricultural Notes

Many Items Of Interest To The Western Farmer

Tests at the Rowett Institute, Scotland, showed that oats made a suitable feed for pigs in any form except oatmeal.

Pneumonia among goats was introduced into Greece from Asia Minor in 1920 and has recurred every year up to 1931.

During the month of April, 4,860,537 bushels of wheat were ground in Canadian mills. The daily capacity of mills operating during the month amounted to 96,795 bushels.

In Canadian first grade creamery butter, salting must all be dissolved and not over two per cent in butter for the British market unless the grader is notified that the butter is for a special market.

The chief object of the new Canadian rules and regulations governing commercial poultry hatcheries is to ensure an adequate supply of chicks at commercial prices and of such quality that they will develop into profitable producers on the farms.

Flour production in Canada for the month of April amounted to 1,088,785 barrels, which was higher than for the corresponding month of last year, when 1,013,486 barrels were produced, and slightly above the production of the previous month.

Nitrogen is taken up by plants from the soil in the form of nitrates, but however abundant the nitrates may be they cannot be utilized by plants without an available supply of water because nitrates enter the root in solution.

Studies conducted at the yellow fever laboratory of the Rockefeller Foundation at Bahia, Brazil, have shown that yellow fever virus may remain alive in chicken meat and in ticks of South African dogs for a considerable period.

Well over one half of the wheat acreage of North Africa is devoted to durum wheats, Algeria and Morocco seedling particularly high proportions of this kind. The main markets for North African wheat are found in France and Italy.

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that, daily artificial, or artificial daylight exposures of 17 hours or more are injurious to tomatoes.

Trials at the Kentucky Experiment Station of fermenting cornstarch as a substitute for horse manure for heating hotbeds indicated certain advantages for the cornstarch, such as greater uniformity of heat, provided the stalks were cut into short lengths and thoroughly wetted.

Experiments in banana breeding have been carried on at the Imperial College of Tropical Agriculture at Trinidad, British West Indies, since its inception as the West Indian Tropical College in 1922. This is of special interest to Canada on account of the Dominion's close business relations and active participation in the banana trade of the West Indies.

Care Of Rubber Belting

Vegetable Castor Oil Will Keep It In Good Condition

A cheap and effective method of keeping a rubber belt in condition and to prevent slippage is to apply 20 to 30 drops of vegetable castor oil once a week on a small rubber belt, or about one-fourth to one-half ounce on a main drive belt. Mineral oil of any kind should never be used on rubber belts. Most commercial belt dressings are not suitable for rubber belting and should not be used except on the advice of the belting manufacturer. Rubber belts should be left on the pulleys, day and night, rain or shine.

When you hear a grasshopper chirp, you can be sure it is warmer than sixty-two degrees Fahrenheit. The insect is silent at colder temperatures.

Employment in Belgium is now above last year's figures.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a commission for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agent to exhibit her work. After a party at an exclusive club in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Watson, his former roommate with whom he has quarrelled. After a party at an exclusive club in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Watson, his former roommate with whom he has quarrelled.

It was the kind of autumn day that had inspired poets to sing of golden sunshine, flaming foliage, nodding daisies—the grand finale of nature's triumphal symphony of the harvest, of another season's work richly and abundantly completed. It was a day which gave to the soul content, the mind peace and the heart a glowing gratitude for the mere privilege of life. The very air breathed indolently of relaxation after work accomplished, of imminent promise of rest, of the very antithesis of the hope and ambition of the springtime.

Peter and Camilla paused in their struggle of doubts and fears and ambitions, and left that world of strife behind them when they boarded a bus for a wooded park ravine outside the city, equipped with only a small compact hamper into which Camilla's skill had stowed all the requirements for a broiled steak dinner.

A considerable walk from the highway tired them just enough to promote that delicious sense of lazy relaxation when they had reached the selected spot and scrounged down in a shaded retreat, beside a bubbling brook. Its busy, gleeful sound as the water tumbled over rock barriers and retarding obstacles, undaunted, seemed toward its destination, seemed to mock their vain and futile questioning of destiny to their restless impatience and petty bickerings. It challenged them to meet life as it followed its course, determined, but merrily, with a song.

Peter stretched his long body on the grass and rested his head in Camilla's lap, while she twined her fingers in the golden waves of his hair and stroked his cheek lovingly.

Dry, colorful leaves rustled in the trees above them or scurried with the wind down the course of the brook's stream, and the rustle of leaves dropped softly and gracefully from branches overhead, fluttering in lazy spiral curves to join their gleeful companions that danced and whirled on the ground. Birds called cheerful greetings through the foliage, chirped contentedly, and their bright sounds echoed clearly in the sound, metallic air that was a flood of golden sunlight.

Avis and the perplexing difficulties of life seemed very far away. Even the recent tragedy which had cast so dark a shadow upon their happiness seemed more remote and inconsequential. Strange that man, heir and lord of so much grandeur and peace that nature provides, should struggle so desperately to add to that heritage the less lovely, grosser possessions of his discontented imagination. But someone started it, so all posterity had to follow; and in the march of centuries, the pace has grown so rapidly that many have forgotten even the object toward which they are pressing on, or the hour of complete surrender to the elemental forces about them, these two minute atoms in the mighty mass of mankind seemed to recapture some of the hope and confidence with which they had begun their life together, a few months earlier. Confidence in each other and in themselves, courage to press on, ultimate promise, beckoned them with new glimmers.

"It won't be long now," Peter told her gleefully, "until I can take you to my girl right. We'll forget all about Paris and perhaps, some day—But that isn't now. I'm going to work like a slave—not on a chance, but with the kind of solid objective that all work should have, and as soon as I have paid my debts and got something ahead we are going to take a house somewhere, in the country or

on some sculpture for Avis brought to his mind recent visions of their hours of consultation and planning together. Avis would make the most of that opportunity, which was undoubtedly her reason for having Peter do the work. Of course, she was glad for Peter to have a good chance, but she was not just a needed definite encouragement, she tried to assure herself. But there was no denying the significance of the situation. She tried to appear interested, as she would have been in any other such prospect.

"What kind of things are you doing for her?" she inquired casually.

"I don't know. Some studio stuff for her, and garden pieces for her mother. That is what I've got to get busy and find out. It means that I'll have to go to the Werth's for tea and inspect their gardens with an alert eye to what is lacking in my line, suggest and plan with them. It's a good start, anyway."

He agreed, however, that Camilla's plan for an afternoon and a picnic supper in the woods on Saturday was a jolly idea, and Camilla hoped prayerfully for a glorious autumn day for their first opportunity of the kind in a long time. Providence was kind and provided a perfect atmosphere.

HOW TO KEEP COOL

Take an effervescent glass of pleasant-tasting Andrew Liver Salt when you begin to feel the heat. At once you will feel cooler—and you'll stay cooler. Andrew's salt is just what you need to cool your blood. Taken occasionally, say twice each week—Andrew will keep you in perfect health by purifying your system and insuring regular and complete elimination. At all drugists. In 10c, 25c and 50c. New, large bottle, 75c. Sole Agents: John A. Huston Co., Ltd., Toronto, 28

on the lake, where I can work and you can do nothing but plan for us and inspire me. That shouldn't be so very far away, lovable."

"I hope it isn't," Camilla agreed. "By that time, I shall have proved to myself either that I can or can't be a success in my own work, and then I'll be ready to resign and just be Peter Anson's wife."

And will that be a big enough ambition for you?" he asked anxiously.

"That is my greatest ambition, and it isn't such an idle one as you may think," she laughed.

"My precocious!" The declaration reminded her of those early days of their marriage. It didn't seem possible that so many unpleasant and tragic things had happened since then. He continued, quietly. "I guess you're right. It takes a woman with brains and some cleverness to keep a man in line, in spite of and inspired with the cause; to march forward, show courage, keep faith and win out. But I picked a woman who can do it if anyone can."

"Dear Peter," Camilla laughed fondly, "you could do it all alone, without me; but with love, the adventure will be so much more worth the effort."

"Don't I know it? That is all that makes it mean anything."

They never referred again to the catastrophe of the broken figure, never ventured to guess who might have been responsible. It was no futile, anyway; the thing was done, an irreparable loss. And each of them was reluctant to enter into that hideous cold outdoor accusation and wonder where they had faced each other once for just a few horrible moments. They evaded that experience with dread.

This delightful solitude of shared understanding and faith, this sense of more in keeping with the beauty of their love, that they kept within its boundaries even as one who drives along a smooth highway without venturing into uncertain by-roads and dangerous places.

Together, they collected dry wood for a crackling, sizzling fire, watched the gray smoke curl upward and the red coals emerge which drew them near the glowing warmth with the early retreat of the sun and the hushed approach of twilight.

Peter broiled the two club steaks on a diminutive grill over the fire, their succulent flavor mingled with the aroma of bubbling coffee, pungent smoke and sharp tang of autumn air. They dined leisurely in the first light, and turned again reluctantly toward the strife of toil and heartache, building fortunes and dodging traffic that is known as civilization.

Villagers Fear Big Gun

Heavy Artillery To Be Tested Near Shoeburyness, England

Britain's latest monster gun, said to be of 15-inch caliber and destined for the great Singapore naval base, on which work is being hurriedly pushed ahead, will be tested near Shoeburyness, England.

The three greatest pieces of heavy artillery in the world are to be included.

At least one of them is to have its firing trials there, and people over a wide area already suffering from the blowing out of windows and the cracking of ceilings from the reverberation of guns at the Coast Artillery school, are frankly scared by the thought of what the effect of firing the latest giant may be.

An emplacement 30 feet deep, with a diameter of about 100 feet, has been sunk and gun-mountings have been constructed in 24 feet of concrete.

It is said that the gun will be fired without anybody being in the pit with it, the loading by crane; and the firing being automatically controlled.

Military police patrols have now been introduced and the villagers all along kept away from the isolated spot where the gun is to be mounted, and their freedom more restricted than ever.

A Leicester, Eng., father, two sons and two daughters are drawing odd-penny pensions, the father being 94, sons 79 and 68 and his daughters 72 and 67.

Will Not Be Exhibited

Inventor Comments To Suppression Of Death Ray Machine

An outstanding invention of the century, a death ray machine, will not be exhibited at the National Inventors' Congress at Omaha, Nebraska, President A. G. Burns, Oakland, Cal., told delegates.

The invention was the subject of a report by the United States government, with the consent of the inventor, Burns said. He said the machine, capable of killing birds in flight two blocks away, was perfected by Dr. Antonio Longoria, a Cleveland, Ohio, physician and electrical engineer.

"I witnessed a demonstration of the machine," by invitation in Cleveland last October," Burns said. "It resembled a motion-picture projection machine in appearance. Several government scientists were there."

Dr. Longoria turned the ray on rabbits, dogs and cats. They fell over, instantly killed, their blood turned to water. The same thing happened to pigeons, uninclosed and allowed to run a distance. They fluttered to the ground and were dead when picked up."

Because of its terrible death-dealing possibilities, Dr. Longoria, according to Burns, readily agreed with government representatives that the machine be suppressed.

Sun Spots And Weather

More Rain And Fewer Grasshoppers Is Indication

Cheering words for agriculturists of Western Canada were issued by A. W. Meggett, past president of the Winnipeg Astronomical Society, who predicted more rain and fewer grasshoppers are indicated for Manitoba and the west between now and 1938.

The reason for his assertion is that spots on the sun are approaching their maximum period. Since 1928, Mr. Meggett explained, the last time at which sun spots were at their maximum, the sun has been fairly quiet. There has been a falling off in rain and insects, including grasshoppers, have been multiplying.

"Records kept in Manitoba since 1895," he said, "show that where there has been a maximum sunspot period, there has also been a minimum grasshopper period."

"As the number and size of the sun spots increase, the amount of ultraviolet rays also increases, playing havoc with the insect world, and bringing increased rain because the electrification of the upper atmosphere helps to form cloud particles with more abundant water vapor."

THE RHYMING OPTIMIST

By Aline Michaelis

LOVES CROWN

Nothing of this did you speak, O, my love,
When you came my way;
Only your voice was the voice of a dove.

And your words were gay,
Laughter was light upon your lips,
Showed the sky all blue;
Garlands you wove me for life's
When I went with you!

Nothing of this, O, my love, did you tell,
And I tremble now;
Strangely the winds to a tempest

And the creaking tough
Splinters and falls in the gusts of
Life.

That are swooping down;
Yet, how is it your garlands frail
Have become a crown?

Speedy Rail Service

G.P.R. Provides Faster, More Frequent Service Between Regina and Moose Jaw

The Canadian Pacific has inaugurated a special gas-electric service between Regina and Moose Jaw, making seven trips each way daily except Sunday and four trips on Sundays. In addition, fares have been reduced as follows:—One way \$1.25, return \$1.55 with special week-end fare of \$1.45.

This particularly fast, comfortable service between the two cities should prove very convenient for and popular with the travelling public.

The United Kingdom remains Canada's most important market for canned foods, taking over 92 per cent of Canada's total exports of canned food in the last fiscal year, valued at 11 per cent of the canned vegetables.

There is frequently more power in a woman's tears than in a man's argument.

The most valuable pearls are produced in tropical waters.

Ease Pain, Headache in Few Minutes

1. PEG, I'M FRANTIC, THIS WORK MUST BE DONE—AND I'VE A SPLITTING HEADACHE

2. LATER

LOOK WHAT I'VE DONE, PEG—ASPIRIN SURE STOPPED THAT AWFUL HEADACHE IN A JIFFY—NEVER FELT BETTER!

DON'T WORRY, GET SOME ASPIRIN TABLETS AND YOUR HEADACHE WILL BE GONE BEFORE YOU KNOW IT...

I KNEW IT WOULD! ASPIRIN IS THE QUICKEST CURE FOR PAIN. KNOW IT!

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia—the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantaneously you swallow it. And thus is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer is in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that B-F-P-E-E it touches bottom, it has started to disintegrate.

What it does in this glass, it does in your stomach. Hence its fast action.

MADE IN CANADA

Curiosities in Siam

Natives Regard Weird Things In Nature As Spirits

Weird curiosities of nature, feared by natives as spirits, were found in remote parts of Siam by Dr. Hugh M. Smith when he collected zoological material for the Smithsonian Institution. In the mountains of northern Siam Dr. Smith pitched camp on a river bank covered with a living carpet of daisy langlers, with legs nearly three inches long. The entire surface of the land seemed to be in motion. When the creatures became active at dusk they made a noise like dried raindrops as they moved over dried leaves on the hillside. On one expedition Dr. Smith ascended the reputedly "haunted" mountain. On the grassy summit he found pine and chestnut trees garlanded with hanging orchids, and with like gibbous leaves among the branches. This cloudland forest contained chattering monkeys, barking deer, several species of squirrels including one rare giant form, bamboo rats, porcupines and black bears.

British Speed Ace Beaten

Youth Defeats Malcolm Campbell In Home-Made Car

A youngster in what was virtually a home-made car had the thrill of beating Sir Malcolm Campbell, holder of the world's fastest land speed record. It happened at Brooklands in the fourth race.

He was W. E. Harker and he proudly called his car a Harker Special. It was driven by two small M.G. engines coupled up with great skill by this young engineer. Campbell's car was the giant Sunbeam, of 3,976 c.c. The Harker Special was only 1,492 c.c.

Campbell started scratch. Mr. Harker in his homemade car had a start of 31 seconds. Campbell drove with all his accustomed skill. He overhauled the whole field, but found his master in Mr. Harker and his Harker car.

Canada's Fur Production

Canada's production of raw furs in the twelve months ending June 30, 1933, amounted to \$10,305,154, a slight increase over production of the previous year, government statistics reveal. About 50 per cent of the total value is represented by furs taken from animals raised in captivity.

There are 6,000 deaths annually in the United States from whooping cough.

Sure Signs

of kidney trouble are pain in the back, difficult urination, deposits in urine. GIN Pills relieve kidney trouble by gently soothing and healing the inflamed tissues. For a box at all druggists.

GIN PILLS FOR THE KIDNEYS

When the Nicholson twins, railroad pioneers of Alberta, celebrated their 70th birthday this year it marked the 73rd year spent together. They were separated for two years when Peshaw immigrated from Kew-lick, Cumberland, England, in 1886, but letters, describing the new country, brought George out in 1888.

Plastic surgeons claim that more men have their faces lifted than women.

PROPAGATION AND PROTECTION OF BEAVER

Protection of beaver in Alberta has not had that consideration and support that the importance of the matter demands. There are several very cogent reasons why this should be done, possibly the greatest through the necessities of these small animals for an ample supply of water, and their ability to create their own swimming pools, through their industry and that God-given intelligence which enables them to build dams and hold back sufficient water for their needs.

One of the greatest causes of famine is drought, and one of the greatest causes of drought is the quick runoff, when the snows melt in the mountains in the spring and summer freshets from the watersheds, when the rivers, forming the arteries of a country rise.

The Dominion government, realizing the wisdom of controlling those areas where our principal rivers rise, reserved that tract of country in and along the base of the mountains, that had not been set aside for park purposes, with the idea of protecting these mountain slopes from denudation of timber, in order that our water supply should be maintained. When the resources were turned over to the province, the policy of retaining these areas as forest reserves was continued. Even with that measure of conservation, our streams at times have run dangerously low, and in some cases have dried up.

To help out this situation, and for other reasons which will be enumerated, it is strongly urged that the whole of the area along the foothills, from Peace River to the international boundary should be stocked with beaver, who would create a series of reservoirs, at no cost to the country, which would have the effect of controlling the waterflow from the hills, minimizing the danger from spring and summer freshets and maintaining a more or less even supply of water the year through.

Another reason which was found from experience is that beaver-dammed streams are usually well supplied with fish.

Another reason is that, in much of the foothills country, many of the trees show signs of yellowing at the top. These trees have begun to decay in the centre from lack of moisture. The retention of water in these areas would rectify that condition.

Our forest reserves would be better protected from fires with a series of reservoirs all along the foothills, and there would not be the same liability to drought on the prairies if we held more water in our lakes and rivers. Then, too, it would assist lumbering operations along the smaller streams, a number of which, that had been used for driving of logs a few years ago, have gone dry.

Our mountain game, which is such a great attraction to tourist hunters, is becoming badly infested with ticks. Where the mother is troubled with this pest, the young become infested as soon as they are born. The drain on the vitality of the kid or doe is such, that they never become normal, and reach winter in such a weakened condition that they become an easy prey to severe climatic conditions or predatory animals. The tick appears to be a pest that is indigenous to dry areas—at least they appear to thrive better in that environment, they being very prevalent in arid parts of Africa. Where animals can bathe and wallow in water, the ticks soon disappear. Give these animals streams

(NOTE—No third prize unless 4 enter and no second prize unless 3 enter)

THE COMMITTEE RESERVE THE RIGHT TO CHANGE TIME OR ORDER OF ALL EVENTS.

Football, Baseball, Softball, Etc.

FOOTBALL

(20 minutes each way, 10 minute intermissions. Draws as arranged.)

9.45 a.m.—First Round 4.00 p.m.—Final 12.30 p.m.—Second Round

BASEBALL

11 a.m.—Senior Semi-Final, 7 innings. 2.15 p.m.—Junior Final, 7 innings.

(Preliminary or elimination games have been played prior to July 2nd)

LADIES' SOFTBALL

(Draws as arranged)

10.00 a.m.—First game. 12.30 p.m.—Second game. 4.00 p.m.—Final game.

RULES

All competitors in the Field Sports must be holders of current amateur cards issued by the secretary of the Branch of the A.A.U. of C. of the province in which they reside. Cards of application forms apply to S. G. Bannan, Blairmore.

All disputes will be settled on the field by the Dispute Committee: R. W. Harold, Pinkey and S. G. Bannan.

All competitors in the open events must hold current amateur cards of the Athletic Union of Canada. No record in the junior events will be recognized unless the maker is the holder of an amateur card.

No entrance fee will be charged, but every competitor must purchase and wear a "Tag" (Adults 35c; Children 15c).

Entries for events (except Football, Baseball and Softball Competitions) may be made at any time before starting. No formal entry required.

DANCE LOVERS

Big Dance Columbus Hall, Blairmore, Monday night, 9.30 to 11. Band Its Orchestra Admission 50c.

in which they can swim, they will soon rid themselves of this pest.

Through the lack of suitable foods in our lakes, geese and ducks in their resting periods, during their pre-winter migration to warmer southern climes, have become, in parts of Alberta, a real menace to the crops of the farmer. It is proposed that selected lakes, those formed by the beaver and others, be seeded with wild celery and wild rice. This would have the effect of attracting birds to that area. It would provide a hatchery ground that would quickly become known to wild bird life, and would have a tendency to deflect the flight of birds from the north to the water stretches along the foothills, rather than to the dryer agricultural sections.

A recapitulation of the benefits to be derived from the propagation and protection of beaver in forest reserves along the foot of the mountains would be as follows: maintaining the water supply of our lakes and rivers at a higher and more even level; minimizing the effects of floods; tending to eliminate drought; protection against fires; moisture for forest growth; providing a supply of water in streams for logging purposes; creation of fishing streams; creation of a water supply helpful to large game animals; deflecting the flight of birds destructive to crops, and providing desirable hatchery grounds.

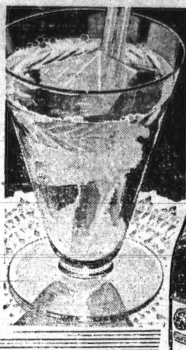

The beaver is a prolific breeder. Five pups can be counted on each year from a pair of old ones. The starting of a beaver colony would not be a costly procedure. Given a suitable location and protection, they would do the necessary work, building their own dams, their houses and collecting their own food supply. The food supply would probably have to be augmented where a hatchery of considerable size was established. When they should become too numerous in the hatchery, house trap them; to other suitable locations, where they could start the same process till all the foothills are stocked.

Trap lines in forest reserves should all be registered, and beaver should be protected from being trapped or taken in any way for a period of ten years, or till a sufficient supply is established, and then only under humane methods, the beaver by that time being more or less accustomed to man and semi-domesticated. If anyone holding a game license, should during the prescribed period take or trap beaver, deprive him of his license, and take severe measures with anyone, who, not having a license, should take or trap beaver. No dealers should be allowed to traffic in beaver pelts during the closed period, and Indians should be prohibited from taking beaver that would be propagated under this plan.

The above are merely a few suggestions, which if considered favorably by the premier, minister of agriculture, game commissioners, and governing bodies of the different legislative groups in Alberta, would go far towards the propagation of some valuable species of wild life.

ADVERTISING turns over stocks rapidly, and therefore multiplies profits. This means that prices in a shop which advertises can be short rather than long.

Of this you may be sure: Prices in a shop which advertises are not MORE than in a shop which does not advertise. The chances are that they are oftentimes lower.

This, also, is generally true: You will find better goods, better values and better service in those shops which turn over their stocks rapidly. This means, as a general thing, shops which advertise.

A NOTE TO MERCHANTS

Advertising costs you nothing—it is paid for by the profits on increased sales.

Advertising is easy—it is simply saying in writing what you say to the customers in your shop. Turn over stocks quickly, if you would make more money.

COWLEY HAPPENINGS

The Cowley ladies' bridge club gathered at the home of Mrs. Christie on Tuesday night, when they gave her a surprise party. After cards, a tasty supper of strawberries and cream was served by the ladies of the club.

Mrs. L. Christie and Mrs. H. C. Morrison will leave on Saturday's train for extended visits in the east. Mrs. Christie will spend most of her time while away in New York city, while Mrs. Morrison will visit relatives in Truro, Nova Scotia.

James McLean, of Lundbreck, who has been seriously ill for several days is reported as being considerably better, and is well on the road to recovery.

Ed. Cowin has returned from a few days visit to Calgary.

STATE HEALTH INSURANCE

State health insurance for Alberta will move one step nearer ultimate relation through a meeting of interested persons that Hon. George Howley, minister of health, purposes calling for some time this summer. The health department is meanwhile gathering data to be placed before such a meeting and to be used afterward in a campaign of public information. The general scheme involved in the health insurance report to the last legislature will be the basis of both the meeting and the campaign following. Mr. Howley says that he intends as soon as possible to invite to a round-table meeting, representatives of women's organizations, executives and health officials, and any other organizations or individuals that may be in a position to contribute a campaign of information. This is in accord, he says, with an undertaking he gave in legislature, and the purpose will be to discuss thoroughly the details of the proposed health plan.

Robert Nolan, of Fernie, has been appointed attitudinarian magistrate.

A commercial traveller, staying at a small hotel, wished to catch an early morning train and asked the proprietress for an alarm clock. She produced the clock and remarked: "We don't often use it, sir, and sometimes it sticks a bit; but if it doesn't go off, just touch the little hammer and it'll ring alright and possibly wake you."

POWERFUL SKIN REMEDY DISCOVERED

Dries Up Eczema, Barber's Itch and All Skin Eruptions

This splendid surgeon's prescription now known all over America as Moore's Emerald Oil, is so efficient in the treatment of skin diseases that the itching of eczema stops with one application.

A few applications and the most persistent case of Eczema is often healed seldom to return. Moore's Emerald Oil (full strength) is safe and pleasant to use. It is dispensed by druggists everywhere.

BELLEVUE HAPPENINGS

Mrs. J. Tilley, of Los Angeles, Cal., is visiting her father here, Mr. A. Hallworth. Mrs. Tilley, before her marriage, was Miss Florence Hallworth. She has been residing in Los Angeles for the past ten years, and this is her first visit home in that time. She will be returning south to-day.

Mrs. Buck, of Toronto, is visiting her daughter, Mrs. Fred Utley, here. Mrs. Buck is on an extended vacation, and after leaving Bellevue will visit several of the Pacific coast cities, going as far as Los Angeles before returning east.

Jim Pitt was a Lethbridge visitor for the golf tournament over the week end.

Mr. and Mrs. C. W. Johnson, Mrs. William Blinston (of Cranbrook), Mr. and Mrs. J. L. Cousins, Mr. and Mrs. James Cousins, Mr. H. M. and Miss Ruby Cousins were Waterloo Lakes visitors on Sunday.

R. T. Johnson, who spent a few days at Vancouver, returned home on Sunday.

The football game here on Saturday promises to be a good one. Hillcrest and Bellevue will clash. Come and give the boys some encouragement.

Mr. and Mrs. J. Robinson, of Lundbreck, who had been guests of Mr. and Mrs. J. Curry, returned home on Saturday.

Mr. and Mrs. Fred Hallworth returned home on Monday, after spending a vacation at Vancouver.

George Chiarovano has a large crew of men at Lillie, dismantling the old hotel. George has a lot of lumber for sale, brought down from Lillie. Clem Stubbs, of Michel, was a visitor here on Tuesday.

The Bellevue school board has been busy this week with meetings galore. School closes on Friday, to reopen early in September.

The Bellevue Bakery staff held their annual picnic on Sunday on the old road over the Crows' Nest summit. All kinds of sports for young and old were indulged in. The Dough Punchers won two ball games, 9-4 and 17-5. Some of the kids reported having devoured 20 cones of ice cream. A good time was had, so Bert Dryden said, and he should know.

Mr. and Mrs. H. Harrison and daughter Yvonne are leaving Saturday for Los Angeles, where they will spend a month's vacation.

The Bellevue baseball boys have won four out of the last five games played, and are now ahead in the league. They have been going big guns of late, improving all the time.

Charlie Connors can be seen daily getting into shape for the five-mile marathon at Blairmore on July 2nd.

When a lady entered a local meat market on Tuesday and was shown a prime Alberta lamb, she had the audacity to ask: "Is this Canara?"

EDDIE, THE AD MAN

YES, SIR, THE OLD ADAGE ABOUT ADVERTISING IS STILL THE BEST: "IT WORTH ADVERTISING, ADVISE IT FOR SALE."

INTERESTING RESOLUTIONS SUBMITTED TO RECENT SESSION OF PARLIAMENT (Continued from last week)

In view of the increasing and insistent propaganda that is being put before the people of Canada in connection with several schemes of immigration, we therefore present the following resolution:

Whereas some seem to be lending a sympathetic ear to certain parties advocating an extensive immigration policy in the near future;

Therefore Be It Resolved that the Native Sons of Canada protest against any form of immigration at this time inasmuch as there are several hundred thousands of our own citizens unemployed and in need of employment;

Be It Further Resolved that we recommend that those already in Canada be rehabilitated first before their chance at livelihood is interfered with by further immigration into Canada.

Believing that it is in the interests of Canada that the coal fields of Canada be further developed and that Canadian heating systems be devised for the use of Canadian coal, we would, therefore, recommend to you that further encouragement be given by means of publicity on the part of the Government to Canadian coal.

The Native Sons of Canada believe that it is necessary to impress upon the people the greatness and potentialities of Canada, and, as we believe that much can be done in this regard by means of motion pictures, we therefore present the following resolution:

Be It Resolved that the Native Sons of Canada, in convention assembled, petition the Government of Canada to order that a certain percentage of every show given contain films on some Canadian themes. This might take the form of a newswreel on Canadian topics and a newswreel that is advertised as being Canadian should be Canadian and nothing else. Other newswreels could be shown separately if the management so desired.

Our Society deeply regrets to learn that an effort is being made for the restoration of titles in Canada and trusts that this noxious relic of feudalism, with its depraving tendencies—snobbery and sycophancy—will never appear again as a blot upon true Canadianism, and that no resolution or bill for the restoration of titles will be seriously entertained by the Government or Parliament of Canada. Our National Council at its last meeting adopted a resolution to the above effect.

We recommend to the Canadian Government that, when the time comes for the appointment of a Canadian Governor-General, the Canadian Government submit to His Majesty the King the name of a Canadian citizen as Governor-General. We also recommend to you that the name of Governor-General be changed to that of Viceroy.

Whereas it is necessary for Canada to decrease expenditures; and

Whereas the sum of about \$500,000 a year is spent in connection with the office of Governor-General; and

Whereas in ten years this will amount to about \$5,000,000;

Now Therefore Be It Resolved that the Native Sons of Canada recommend to the Dominion Government that the office of Viceroy of Canada, officially known as the Governor-General of Canada, be not filled for a period of ten years after the term of the present Governor-General expires, and that the Chief Justice of the Supreme Court of Canada act in his place and stand, invested with the necessary power and titles.

In connection with the rumors concerning amalgamation of railway services of Canada and their subsidiaries, we beg to advise you that, by resolution, the following was passed by the convention:

Resolved that the National Council of the Native Sons of Canada oppose amalgamation of our railroads and their subsidiaries, such as express, telegraph and pullman companies.

Whereas the youth of Canada, generally, are underprivileged in the mat-

ter of physical training; and

Whereas considerable sums of money are voted yearly by the Federal Government for the continuation of cadet training in schools of Canada; and

Whereas healthy and strong-bodied citizens are the primary asset of a nation; and

Whereas the building up of the human body is more easily accomplished in youth than in maturity; and

Whereas military training can be accomplished in a relatively short period when a healthy person reaches military age; and

Whereas it is equally important, if not more, for a woman to be healthy and strong in body and mind in order to bring forth children that are likewise healthy and strong, as for a man whose lot it may become to wear a military uniform; and

Whereas cadets' training is generally confined to the few, and of those only to the male of the species;

Now Therefore Be It Resolved that the Native Sons of Canada petition the Federal Government to curtail the yearly subsidies to the account of cadet training and to substitute in its place generous grants to encourage a nation-wide movement for the gradual replating of cadet training in the schools of Canada by proper training in PHYSICAL CULTURE for ALL children of both sexes attending same without placing any direct expense whatever upon the parents of the children concerned.

Whereas we believe that it has been the practice in the past to accredit the Canadian High Commissioner in London to the Dominions Office; and whereas we believe that this is not in accord with Canada's constitutional position, we therefore recommend that the procedure be changed and that this officer be accredited to the Government of Great Britain.

Whereas the Dominions Office of the Government of Great Britain is a reflection upon the political status of the Dominion of Canada, we respectfully urge the Government of Canada to recommend to the Government of Great Britain that the Dominion Office be done away with in as far as it pertains to the Dominion of Canada.

We recommend for your consideration the thought that the Great Seal of Canada should be used on all occasions when a seal is required in connection with Canadian affairs such as, letters patent to the Governor-General, commission to the Governor-General, full powers of plenipotentiaries, letters accrediting ministers and commissioners to foreign nations, treaties.

Where a treaty has been made by Great Britain, which extends to Canada most favored nation treaty privileges, we recommend that negotiations be made to arrange a new treaty and the application of the old treaty

to Canada should be terminated. The relations of Canada with foreign countries should be direct.

Whereas we believe that it may be strictly construed that certain British statutes still have application to Canadian affairs, we therefore recommend for your consideration and necessary action the repeal of such statutes in as far as they apply to Canada and a re-enactment by our own Canadian Parliament if their provisions are desirable. We refer to such acts as the Geneva Conventions Act, 1911; and Punishment of Colonial Governors, etc.

Whereas we believe that experts have been brought into this country to do work that could be done by those

already in Canada, we, therefore, urge upon the Government the necessity of a still further and more particular investigation being made in each case before such alleged experts are brought in to work in Canada.

The Native Sons of Canada have consistently stood against courts other than Canadian being the final court in regard to Canadian matters, and we therefore again bring before you the recommendation in this matter that we presented to you on February 19, 1932:

(Continued next week)

A Claresholm man named Laidlaw married a girl named Kahoots. We're she's no longer "Kahoots."

Gum Dipped
Cords coated and insulated with rubber to eliminate internal heat and friction, have 8% longer lasting life. For this alone it would pay you to buy Firestone, but in addition you get 2 Extra Cord Plies under the Tread and a Scientifically Designed Tread that gives 25% more wear—all at no extra cost. CANADIAN MAY TAKE CHARGE OF CENTRAL BANK

Ottawa.—Mention of the name of Mr. Edward Peacock by Prime Minister R. B. Bennett in connection with the government of Canada's new central bank, caused some speculation in parliamentary circles. Sir Edward is a Canadian who has had a highly successful financial career in London and holds a high position in the Bank of England.

Mr. Bennett, opposing an amendment, which would restrict selection of a bank governor to British residents in Canada, said this would bar such a man as Sir Edward. He said it would be a bad principle to declare a Canadian born and educated, who had gone abroad, and fitted himself for a high position would not be eligible for that position when it was open. The amendment was defeated on a standing vote.

Earlier Mr. Bennett said he had been informed that bank directors were of the opinion that there was no man among them capable of taking over the control of the central bank. He was opposing a move launched by Maxime Raymond (Liberal, Beauport), to make the Bank of Canada bill require that the governor, deputy governor and assistant deputy governor be Canadians domiciled in Canada.

For commercial banking, Canadians were as good as any in the world, the prime minister declared, but none of them had the necessary experience with the duties of a central bank to take over the management of such an institution.

In no other country in the world where a central bank operates is a greater measure of control exercised over that institution by the government than is provided with respect to the Bank of Canada, Mr. Bennett told the house. In an exhaustive analysis of the history and functions of central banks Mr. Bennett replied to many objections and criticisms from the opposition.

He referred particularly to an amendment proposed by H. J. L. Halden (Liberal, Yarmouth-Sheburne), which would give the government power to appoint four of the seven directors of Canada. The amendment came when the Bank of Canada bill was before the house in committee.

The aim of the bill, said Mr. Bennett, was to remove the bank from possible political influences. In general it was in line with the modern tendency of financial policy which was to regard central banks as "great public trusts" rather than as departments of state.

Mr. Bennett promised to give serious consideration to a suggestion from Rt. Hon. Mackenzie King, Liberal leader, that the new bank might be able to thwart the wishes of the government of the day in matters of trade and fiscal policy.

Mr. King said he feared this contingency might arise in the event of the directors of the bank, for example, favoring the development of trade within the empire and the government wishing to promote general world trade.

He could see no possibility of such a contingency arising, said Mr. Bennett, but the government did not wish to hand over to the bank any measure of control over fiscal policy. If Mr. King or any other member could show there was a danger of this and suggest a method of remedying it he would be glad to give effect to his views. In the meantime he would consider the matter further himself.

Japan Keeps Plans Secret

No Information Given Out Regarding 1935 Naval Conference

London.—The Japanese have erected a diplomatic fence of secrecy around their plans for the 1935 naval conference despite assurances of the fairest treatment by representatives of Great Britain and the United States.

Tsuneko Matsudaira, Japanese ambassador, declared to Sir Norman H. Davis, American representative in preliminary bilateral discussions, what are the present proposals and hopes of the Tokyo government.

After Davis had given Matsudaira an unreserved promise that there will be no sort of Anglo-American understanding against Japan, he questioned the Japanese ambassador regarding his nation's plans.

Bumped By Sea Monster

Crew Of Schooner Has Exciting Experience Off Nova Scotia Coast
Yarmouth, N.S.—A night of terror aboard the auxiliary schooner Marjorie E. was described here by fishermen who declared a monster of the sea had almost lifted their vessel out of the water off the Nova Scotia coast.

"It happened Sunday night," related one of the crew. "The night was clear and all of us except the watch were in our bunks."

"Suddenly there was a thundering crash that threw three men from their bunks to the floor. One of them shouted 'We've been rammed—let's get out on deck.'"

"Out we scrambled to the moonlit deck and we were amazed to see in the swirling water the huge form of what appeared to be a whale."

"In frisking about the thing probably had risen directly beneath the ship and the force of the impact lifted her almost clear of the water, allowing it to plunge back with terrific force."

"We didn't know what to do, but we started our engines full speed ahead and left the scene in a hurry, you can bet!"

Across Atlantic In Yacht

Lone Adventurer Makes Perilous Trip From Ireland
St. John's, Nfld.—A lone adventurer from Great Britain sailed his tiny yacht into harbor after crossing the Atlantic and then tumbled gratefully into bed for his first real sleep in 24 days.

Commander R. B. Graham, R.N., was skipper and crew of the 24-foot yawl on the perilous crossing from Ballyvaughan, Ireland, 24 days ago, and though heavy weather beset his little boat at times, made a remarkably fast crossing.

To hear Commander Graham speak sailing across the Atlantic single-handed might be an every-day happening. "Yes," he said, "we had some varied weather, but the boat behaved splendidly."

Nothing worried him on the long trip, he said—except lack of sleep. At night he would turn in after setting a course and leaving the yawl's helm, but his sleep would be interrupted from time to time.

Crop Situation Improves

Dominion Bureau Of Statistics Issues Report For West

Ottawa.—Cereal crops in the prairie provinces were adjusting themselves to the complete change in weather conditions which occurred during the first week in June, and which had continued since that time, stated a crop report issued by the Dominion bureau of statistics.

In some areas, notably the southern portions of the three provinces, drought, wind and grasshoppers have taken a toll of the crop and even the favorable weather so far experienced in June will not offset damage. In these areas, however, a noticeable improvement has taken place. Grasshoppers have been generally inactive. Crops in northern areas of the three provinces have made steady progress during the past week.

Mineral prospects range from fair to good except in southern districts, where adverse weather conditions caused serious damage.

Better Feeling Towards Canada

Vancouver—Better feeling towards Canada and Canadian products is being fostered by Col. T. A. Hiam, former assistant to the president, Canadian National Railways, who arrived in Vancouver on the liner Empress of Japan, after what he termed a "scouting" trip to the orient.

No Answer From Thomas

London.—J. H. Thomas, secretary for Dominions, declined to answer in the House of Commons when a questioner asked if the British government was prepared to "bring pressure" on the Canadian government to implement the Ottawa agreement in respect of the Canadian tariff board.

United States Buying Silver

Washington.—United States government has extended its new monetary policy into another field with the signature of President Roosevelt of the Pittman silver purchase bill. The measure directs buying of the metal by the treasury until it comprises 25 per cent of the nation's metallic monetary stock.

Canadian Printing

Ottawa.—The Canadian printing trade employs 32,584 men and women, says the Dominion Bureau of Statistics, and produced \$101,492,853 in 1932, \$36,312,989 representing daily newspaper output.

Second Action Against Rodeo

Tex Austin Is Having His Troubles In England

London.—Troubles continued to pile up for Tex Austin, promoter of the "world's greatest rodeo."

Already accused of terrifying a steer in violation of laws against cruelty to animals, Austin was notified of a new action against him because he staged a charity performance of his gaudy rodeo Sunday.

The new action was instituted by the Lord's Day Observance Society, which seeks to collect \$500 from Austin and \$1,000 from the National Sporting Club.

HEPBURN TO TAKE OVER REINS OF OFFICE ON JULY 10

Toronto.—Mitchell F. Hephburn, the youngest man to ever gain the premiership of old Ontario, arrived here to build up a Liberal cabinet to take over the reins of government, back in the grasp of the party after a lapse of 29 years.

As the 37-year-old Liberal leader, "tired but happy," rested at his home near St. Thomas after a strenuous campaign climaxed with a smashing victory, discussion of the overwhelming downfall of Conservative representatives turned to eager speculation as to the next steps.

It appeared the new regime, the first Liberal administration since 1905, would not be in office for three weeks, or until about July 10. Premier George S. Henry and his ministers, most of them defeated, will clean up their desks before tendering their resignations to the lieutenant-governor, Mr. Hephburn will complete his cabinet slate and formulate the initial program before taking over.

Date of the advent of beer by the glass; possibility of an early session of the legislature to deal with unemployment and relief, as promised by Mr. Hephburn; the fate of heads of 23 boards and commissions which are to be revised, and like questions occupied the minds of the electorate after their record-breaking turnout.

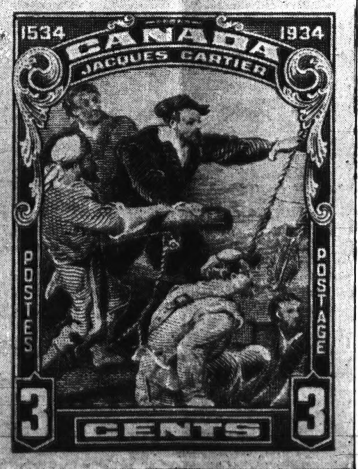

Aftermath of the Liberal avalanche which swept Conservatives out of every seat west and north of Toronto—last took six of Tory Toronto's 13 ridings, were suggestions of recounts in a few seats where the vote was close, and a few unofficial pleas to Conservative headquarters for consideration of a convention to choose a new leader and revise the platform.

Public Works Program

Federal Government Plans Expenditure Of Forty Million Dollars

Ottawa.—The House of Commons has before it the government's public works construction program involving an expenditure of some \$40,000,000 on building operations scattered over the whole Dominion. It is intended to provide employment and stimulate business and industrial recovery. With little discussion the house passed the resolution preliminary to the introduction of the bill to provide for the construction program and gave first reading to the bill.

SPECIAL STAMP COMMEMORATES DISCOVERY OF CANADA

Here is a reproduction of the special stamp to be issued by the Post Office to commemorate the 400th anniversary of the discovery of Canada by Jacques Cartier. The stamp is to be released on July 2nd.

WINS IN SASKATCHEWAN

JAMES G. GARDINER

Liberal leader of Saskatchewan, was returned to power by a sweeping majority.

Saskatchewan Elections

Liberals Returned To Power By A Most Decisive Endorsement

Regina.—The Liberal party under the leadership of James G. Gardiner, were swept back into power in the Saskatchewan elections in a most emphatic manner. With the election of five or six Farmer-Labor candidates, the C.C.F. party will form the only opposition. Not a single Government supporter was elected.

In an interview, Premier-elect Gardiner said the legislature would be assembled as soon as possible. There may be a special session to repeal the School Legislation Act passed by the now-extinct Anderson government.

This legislation, which would automatically come into effect August 1, would place educational matters in the hands of a commission, and "take education out of politics"—as Premier Anderson contended. But it was diametrically opposed to the Liberal policy, said Mr. Gardiner, and he was looking into the legal aspects of the legislation to see if a special session would be necessary to preclude its going into effect.

The campaign had been cleanly fought. The issues were clear and the policy of the Liberal party to enforce economy in administration, effect reconstruction and to improve the trade relations of the Dominion with other countries had been clearly approved.

Deal With Sweepstakes

Informers May Be Unable To Collect Cash If Legislation Changed

Ottawa.—The provision of the criminal code which makes it possible for an informer to sue and obtain the proceeds of a lottery will disappear if the amendment introduced by Hon. Hugh Guthrie, minister of justice, passes the House of Commons. The bill received first reading without discussion. Instead of the informer being able to obtain the proceeds, the measure provides that they shall be forfeited to the crown. The amendment does not apply to small raffles and church bazaars in which the amount involved is less than \$50.

Much Depends On Weather

Moist Warm Days Will Greatly Lessen Grasshopper Menace

Saskatoon.—Extraordinarily early maturity of grasshoppers in Saskatchewan this year may save the crop from late damage by the flying "hoppers," in the opinion of K. M. King, in charge of the Dominion entomological laboratory here. If warm moist weather prevails, the mature "hoppers" quickly become infested with a disease which carries them off rapidly and the early development this year has pushed forward the mature age of the grasshopper into Saskatchewan's rainy season. Much depends on the weather. Given warmth and moisture the damage to crops by grasshoppers after the flying stage is reached may be much less than last year.

Gold Coinage Disappearing

Premier Bennett Predicts That Gold Redemption Of Currency Will Be Resumed

Ottawa.—Expressing the belief that gold redemption of currency would ultimately be resumed, Premier R. B. Bennett, in the House of Commons, predicted that gold coinage would disappear.

Gold redemption would be resumed by the nations of the world "since apparently it is the only basis on which we can have any stability," but the redemption would be in bullion, not in coin.

SORDID DETAILS OF CONDITIONS IN SWEATSHOPS

Ottawa.—Sordid details of sweatshop conditions in eight shoe factories in different parts of Quebec were disclosed to the parliamentary committee on consumer protection. Investigating auditors said they found many breaches of Quebec minimum wage laws and the evidence probably will be passed on for prosecutions.

The committee ventured upon another alley—wages paid in factories supplying goods to department stores. The Quebec shoe manufacturers were selected from advertisements run by different stores but throughout evidence, went unnamed.

Here were the highlights of one plant:

It has made substantial profits for four years. The average weekly wage paid women employees in October, 1933, was \$8.75. The average for 172 men was \$9.39. Of the 172 men, 126 were married with 401 dependents.

Eighty-two men received less than \$8 a week. There were two accidents in one week—one operator lost a finger—from the owner of the factory leaning over the shoulders of his workers, shouting at them to speed up their work.

Fifty per cent of the men and boys in the plant last October received less than the minimum wage set for a week of 52 hours. (The Quebec law, like Ontario's, does not touch men).

One investigator asked a man how he existed on his wages. The reply was that four families lived in one house. The man himself ate one piece of bread for his lunch.

"But how can these people live," asked Sam Factor, Lib. Toronto. "If I were the executive of a department store I certainly would inquire about such terrible wages." The auditor told of conditions in another plant where 96 per cent of the employees were paid below the legal minimum. In one department of 55 girls, only two made the minimum wage and boys received \$2.50 and \$1 for a week of 52 hours. In this factory, 63 per cent of the men were paid 10 cents an hour or less. There was an audible gasp in the committee room when the auditor told of work being done in home by adults and children. About \$150 would be paid for jobs requiring 10 hours of adult work although it was impossible to say what per centage was done by children.

Another plant, dating back to 1908, discharged women workers who could not meet legal minimums, but, on the other hand, paid extremely low wages to men. In the two weeks ending April 28, 1934, the company had 29 men and boys earning less than 10 cents an hour and whose weekly average was \$2.85. One-half the men in the plant earned less than \$6, the minimum for inexperienced women. The average for all men, excluding foremen, was \$6.71 a week and for women, \$7.37.

SAYS LIEUTENANT GOVERNOR IS NOT NECESSARY

St. Thomas, Ont.—"Lieutenant-Governor Herbert A. Bruce of Ontario is one of the finest gentlemen in the country, but I feel he should resign," said Mitchell F. Hephburn, premier-elect, in discussing the general election which resulted in a Liberal landslide.

"I stated, during the campaign, Ontario could carry on very well with the chief justice officiating," he declared. "Sir William Mulock, an aged gentleman, managed easily to sign the new order-in-council and act as lieutenant-governor before Col. Bruce was appointed. I want to make it clear that I have no personal animosity between Col. Bruce and myself. I am of the opinion that, since the people endorsed my statements by voting for my party, he should take cognizance of that fact."

"I certainly intend to hold a special session of the legislature to deal with the unemployment situation. If Premier R. B. Bennett withdraws, as he has announced, federal government grants to direct relief. There will be no pomp and glory connected with the session, for we will simply meet and try to formulate a constructive unemployment policy to help our people."

"I am going to carry out my election promises—every one of them. Those high-salaried officials who have been living on the fat of the land at Queen's Park might as well start packing now, for as soon as I get control they will be removed from office."

Ottawa.—High officials of the Dominion government would not comment on the proposal of Mitchell Hephburn, premier-elect of Ontario, that Lieutenant-Governor H. A. Bruce should resign. It was explained that the office and duties of provincial lieutenant-governors were laid down in the British North America Act and that they were appointed by the Dominion government.

Section 58 of the British North America Act states that "for each province there shall be an officer, styled the lieutenant-governor, appointed by the governor-general-in-council by instrument under the great seal of Canada." A further section states that "... the salaries of lieutenant-governors shall be fixed and provided by the parliament of Canada."

Under constitutional procedure, Mr. Hephburn, as leader of the successful party in last Tuesday's election, will be summoned by Lieutenant-Governor Bruce when Premier Henry resigns and asked to form a government. He will be sworn in by the lieutenant-governor, and the legislature, when summoned, will be opened by the lieutenant-governor.

With respect to administrators, section 67 of the British North America Act states as follows: "The governor-in-council may, from time to time, appoint an administrator to execute the office and functions of lieutenant-governor during his absence, illness or other inability."

Bank Bill Approved

Ottawa.—The senate banking and commerce committee passed with two exceptions, the first 87 sections of the banking bill passed by the House of Commons, June 11. Section 53 dealing with annual and special statements of the chartered banks, and section 75, dealing with the business and powers of the banks, were held over for further consideration.

British Tariffs Attacked

Rome.—German and Italian delegates to an international wool conference here attacked British Empire trade preferences and threatened to curtail imports from such wool producing countries as refused to accept German industrial exports while giving preference to those of other countries.

Canadian Cheese Good

Ottawa.—The quality of Canadian cheese in the United Kingdom was so satisfactory that no suggestions were offered by the largest importers on how further improvements could be made. Sir S. S. British Dominion dairy commissioner, on his return from London and Liverpool.

Silver Export Higher

Ottawa.—Export of silver bullion in May was valued at the rate of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

A storm of grasshoppers swept over a section of the Cowley district last week end.

A party of religious revivalists from Spokane, enroute to Calgary, will likely stop over in Blairmore on or about the 10th of July.

Mr. and Mrs. John A. Kerr returned last night from Wetaskiwin, where they had been to attend the funeral of Mrs. Kerr's father, H. S. Jones, who passed away last week end.

Blairmore Oddfellows and Rebekahs will hold their annual picnic at Crows' Nest Lake on Wednesday next, July 11th. All members are requested to attend.

Hugh McDougall, killed in the Macmine mine last week, was a cousin of Joseph V. McDougall, of Blairmore. McDougall leaves a widow and seven children.

Tony says it will be a week or two before local Communists can be expected to recover from the shock and rude awakening administered by the Ontario electors.

Mr. and Mrs. Frederick G. Perry, of Fernie, announce the engagement of their daughter, Thelma Elizabeth, to Robert Gordon Moore son of Mr. and Mrs. Hugh H. Taylor, of Cranston, the marriage to take place early in July.

A murder charge was recently suggested by a Communist soapbox orator. He claimed that a certain individual who died recently was a victim of murderous tactics of capitalism.

A home-built motor boat was launched at the little dam last Saturday by Ricardo Ubertino and Ephraim Shelski. The young boat builders worked all spring on their craft. The boat is powered with a motor-cycle motor.—Bassano Mail.

Duncan McDonald has been elected president of the Drumheller district Liberals. On his election, Mr. McDonald stated that numerous complaints had been registered regarding the injustice of the Workmen's Compensation Act, and promised that the Liberals would overhaul the act.

The liquor business is a legitimate one and advertising should never have been prohibited in the first place. Why the former refuse to sell his grapes or his grapes for beverage purposes? Will any church refuse to take the money of a member because he is a brewer, a distiller or a liquor store employee? Why should now—er—chase revenue away?—Durham Chronicle.

The garden party, held yesterday on the grounds of the home of Mr. and Mrs. L. P. Robert under the auspices of the Ladies' Aid of the United church, was very largely attended, both in the afternoon and evening. In the evening a concert programme was staged, with vocal and instrumental selections, etc., and a special feature in the form of a parade of women wearing old-time wedding dresses. As a result of the party, a neat sum was realized, which will go towards defraying cost of new floor in the church auditorium.
